# Appendix A: Focus Group Discussion with Adolescents Guide (FGD)

Title	Paving the path to accessible health care for Aboriginal and Torres Strait Islander adolescents
Project Number	
Principal Investigator	A/Prof Peter Azzopardi
Location	Cairns, Victoria
Survey method	Focus Group Discussion

Thank you very much for agreeing to participate in this group discussion.

Today we invite you to share your ideas about the health needs of young people and what keeps young people healthy. We would also like to hear your ideas about why some young people don't want to attend health services in the community.

Everyone's views are important so it will be good for everyone to have a say and share ideas. It is important for everyone in the group to respect each other's privacy so things discussed in the group should not be discussed outside the group, but we can't make sure that this happens. However, the information that the researchers record will be kept confidential. During the discussion, if the names of individuals, places and dates are used, the research team will remove the information and use false/gammon names and dates.

With your permission we will be taking notes and recording today's session on a tape recorder to make sure we gather everyone's ideas, The only time we may need to break this confidentiality, is if one of the research team are worried that is a risk of harm to you or others.

The session today will take approximately two hours. Participating in this project is voluntary and you may leave the session at any time. Any information shared during the session prior to leaving will be used in this study. If you decide not to participate in the study or leave the study, you can do this without having to give a reason or feel that you will be judged about your decision and your care or treatment as a patients at the health clinic will not be affected.

Before commencing the

facilitator will check consent forms are complete and the recorder is working.

Ice breaker activity – TO BE ADVISED BY ADVISORY GROUP

#### Introductions and acknowledgement

• Facilitator and participants to introduce themselves.

### Health strengths & challenges

We would like to learn a bit more about the health strengths and challenges of young people in your community

- What keeps young people feeling strong and healthy?
  - Prompts: culture, connections with family/friends, active lifestyle, nutritious food
- Activity: Body mapping
  - One of the participants will be invited to draw around another participant to create a human outline. Participants will then be invited to draw pictures, symbols or words to reflect their opinions on what keeps young people healthy.
- In your community, what are the main health concerns/problems for young people?
  - Prompts: being away/disconnected from culture, family or friends, social and emotional wellbeing, sexual and reproductive health, smoking, use of alcohol or drugs
- Activity: Body mapping (continued)
  - On the same picture, but using a different colour marker, participants will be encouraged to share their opinions on health concerns that are encountered by young people in their community.

#### Enablers and barriers to accessing primary health care services

Next, we would like to ask about what makes it easier for young people to use health services and barriers to health care that young people may experience.

- How do young people <u>learn</u> about health, and where from?
  - Prompts: health clinic, school, pharmacy, family, friends, school, internet, youth centre
- What services can young people use to stay healthy?
  - Prompts: Community controlled health clinic, mainstream clinic, school, pharmacy, friends/family
  - Are any of these health services especially for young people?
  - Are these health service used by young people?

like/not like about these health services?

Now I want you to think specifically about your local Community Controlled health service

- Is this health service used by young people?
- What do you like/not like about this health services?
- What supports/helps young people to use this health service in the community?

*Prompts: family/friends, Elders, community support, cultural safety, friendly health care staff, reassurance of confidentially, diverse services provided, opening times, cost, transport* 

• What are the challenges/barriers for young people to access this service?

*Prompts: health care staff, opening times, cost, transport, lack of services provided, confidentially, family/friends, cultural safety, age, gender* 

- Activity: Modified priority ranking
  - From the barriers described above, the group will be invited to nominate (up to) 10 of the most important factors for young people accessing primary health care. The characteristics will be listed on a piece of paper. Each participant will be provided with three dots, numbered either 1, 2 or 3. The participants will be encouraged to identify the three barriers that they feel are the most important by place a dot next to issue. A dot with a number 3 will be assigned to the barrier that is most important, a 2 to the second most important issue and a 1 to the third most important issue.

#### Youth friendly primary health service

In this section we would like you to image what a perfect health service for young people could look like. In particular, the key factors that are important to ensure young people are able to access health care service and to ensure health services meet the needs of young people.

- What does a perfect health service look like?
- Now, let's think about what is important within this perfect health service?
  - What services should be offered for young people?
    - Who should be providing these health services to young people?
  - What are the important skills and attitudes of health care staff?
  - Can you describe what confidentially and privacy should look like?
- Finally, let's think outside of the health service and within the community. What would enable/support young people to access the service?
- Activity: Modified community mapping
  - The participants will be invited to draw pictures, symbols or words to reflect their opinions on what a perfect youth friendly service looks like. The group will be encouraged to consider the model of health service delivery. They will then be asked

describe what is important with the health service, in particular, services offered and characteristics of staff. Finally, the group will be invited to think about important enablers in the community that can support young people to access health care.

Encourage the group to explain what they have done and why at the end of each step in the activity.

- Now, we will explore which the characteristics of this ideal health service are most important.
- Activity: Modified priority ranking

to

• From the characteristics described above, the group will be invited to nominate (up to) 10 of the most important factors for youth friendly primary health care. The characteristics will be listed on a piece of paper. Each participant will be provided with three dots, numbered either 1, 2 or 3. The participants will be encouraged to identify the three characteristics that they feel are the most important by place a dot next to issue. A dot with a number 3 will be assigned to the characteristic that is most important, a 2 to the second most important issue and a 1 to the third most important issue.

Encourage the group to explain what they have done and why at the end of each step in the activity.

- What is the best thing about being a young person in your community?
- Lastly, if you could share one message about (health / young people) what would it be?

Thank all participants for their time and their contributions to the discussion.

# Appendix B: Adolescent In-depth Interview Guide (IDI\_adol)

Paving the path to accessible health care for Aboriginal and Torres Strait Islander adolescents
A/Prof Peter Azzopardi
Cairns, Victoria
In depth interviews

Thank you very much for agreeing to participate in this interview.

Today we invite you to share your ideas about the health needs of young people and reasons why some young people may not want to attend health services in the community.

With your permission we will be taking notes and recording today's interview on a tape recorder to make sure we gather all your ideas, but everything you say today will remain confidential and we won't be recordings anyone's name. The only time we may need to break this confidentiality, is if one of the research team are worried that is a risk of harm to you or others.

During the discussion, if the names of individuals, places and dates are used, the research team will replace these with a false/gammon name in the field notes.

The session today will take approximately one hour. Participating in this project is voluntary and you may leave the session at any time without having to give a reason or feel judged about your decision to leave. If you wish to withdraw from the study, please contact the interviewer directly and the information that you shared will be destroyed at your request. If you don't wish to participate in the study or decide to leave the study your care and treatment at the health clinic will not be affected.

The findings from the research will be provided to services to help them improve services for young people. The findings will also be used in journal and conference presentations and for use in other research proposals.

Before commencing the

facilitator will check if the consent form is complete and the recorder is working.

#### Introductions and acknowledgement

- Facilitator and participant to introduce themselves.
- Please tell me about yourself.
  - Prompts: interests, hobbies, sports, siblings

#### Health strengths & challenges

We would like to learn a bit more about your health strengths and challenges.

- Can you tell me about your diabetes/rheumatic heart disease (RHD) story?
  - Prompts: diagnosis, duration, treatment, follow up care, supports, worries, shame
- What do you do to look after your diabetes/RHD?
- Do you talk to anyone about your diabetes/RHD? Who and Why?
- How has diabetes/RHD impacted other areas of your health?
  - Prompts: mental health, physical activity, eye health, at risk behaviours,
- How has diabetes/RHD impacted other areas of your life?
  - Prompts: home, school, work, sports/social
- What keeps you feeling strong and healthy?
  - Prompts: connections with family/friends/teachers, active lifestyle, sports/social nutritious food, medications

#### Experience at primary health care service

Next, we would like to ask about your experience that last time you attended a health service.

- What type of health service did you go to and who did you see?
- Broadly, can you share why you went to the health service?
- Were there any challenges getting to the health service?
- How did you feel whilst you were at the health service?
  - Prompts: welcome, belong, embarrassed, worried/anxious
- How did you feel the staff and the health service treated you?
  - Prompts: friendly, respectful, caring
- Tell me about the confidentiality and privacy you experienced at the health service.

Prompts: seen in a

private space (not seen or overheard), provider explained confidentiality, offered an opportunity to speak to provider alone without parent or guardian

- Overall, were you satisfied with the care you received?
  - Prompts: Feel like your needs were adequately addressed, felt listened to, had an opportunity to ask questions
- What do you think could be done to improve health care for young people living with diabetes /RHD?

#### Enablers and barriers to accessing primary health care services

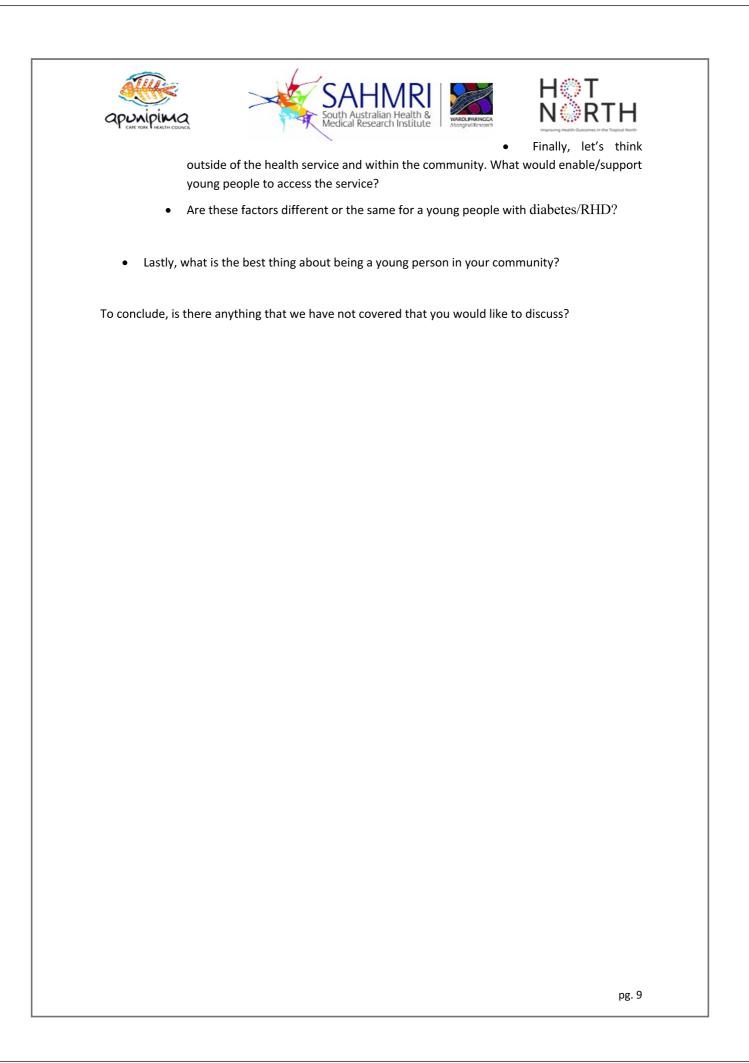

Now, we would like to ask about any barriers to health care and anything that makes it easier for you to access care.

- In your community, what are the challenges/barriers for young people when accessing health care?
  - Prompts: health care staff available, opening times, cost, transport, lack of services provided, confidentially, family/friends, cultural safety
  - Do you think you may experience different (or more) barriers that other young people that may not have diabetes/RHD? Why do you say that / can you explain more?
- What supports/helps you to be able to use health services?
  - Prompts: family/friends, Elders, community support, cultural safety, friendly health care staff, reassurance of confidentially, diverse services provided, opening times, cost, transport
- What do you think could be done to improve access to health service for young people living with diabetes / RHD?

#### Youth friendly primary health service

In this section we would like you to image what a perfect health service for young people could look like. In particular, the key factors that are important to ensure young people are able to access health care service and to ensure health services meet the needs of young people.

- What does a perfect health service look like? Is it a building or is it something else?
- Next, what do you think is important within this perfect health service?
  - What services should be offered for young people?
    - Who should be providing these health services to young people?
  - What are the important skills and attitudes of health care staff?
  - Can you describe what confidentially and privacy should look like?

# Appendix C: Key Informant Interview Guide (KII)

Title	Paving the path to accessible health care for Aboriginal and Torres Strait Islander adolescents
Project Number	
Principal Investigator	A/Prof Peter Azzopardi
Location	Cairns, Victoria
Survey method	Key Informant Interviews

Thank you very much for agreeing to participate in this interview.

Today we invite you to share your opinions and reflections on what the health needs of young people are, what keeps them healthy and explore barriers to attending primary health services.

We will be taking notes and recording today's interview to make sure we gather all your ideas, but everything you say today will remain confidential and we won't be recordings anyone's name. The only time we may need to break this confidentiality, is if one of the research team are worried that is a risk of harm to a young person.

During the discussion, if the names of individuals, places and dates are used, the research team will replace these with a pseudonym/false name in the field notes.

The session today will take approximately one hour. Participating in this project is voluntary and you may leave the session at any time. If you wish to withdraw from the study, please contact the interviewer directly and the information that you shared will be destroyed at your request.

Before commencing the

facilitator will check if the consent form is complete and the recorder is working.

#### Introductions and acknowledgement

• Facilitator and participant to introduce themselves.

#### Health strengths & challenges

We would like to learn a bit more about the health strengths and challenges of young people in your community

- In your opinion, what keeps young people feeling strong and healthy?
  - Prompts: connections with family/friends/teachers, active lifestyle, sports/social nutritious food,
- What are the main health concerns/problems facing young people in your community?
  - Prompts: being away/disconnected from culture, family or friends, social and emotional wellbeing, sexual and reproductive health, smoking, use of alcohol or drugs

#### Primary health care service for young people

Now, we would like to ask about primary health care services for young people

- Do you think young people are interested in their health? Why?
- Do you think it is important to provide services for young people? Why?
- What health services should be provided to young people?
  - Prompts: mental health, alcohol and drug services, management of STIs/BBVs, contraception, condoms, termination of pregnancy, nutrition services
- Are there any health services should not be provided to young people?
  - Prompts: mental health, alcohol and drug services, management of STIs/BBVs, contraception, condoms, termination of pregnancy, nutrition services
- Where do young people in your community go for health care? Who provides this?
  - Prompts: health clinic, school, pharmacy, friends/family
- Do you think young people feel comfortable accessing these services? Why/Why not?
- Are there any other places where young people in your community go to learn about or get information about their health?
  - *Prompts: family, friends, internet, youth centre, schools*

Enablers and barriers to accessing primary health care services

Lastly, we would like to

ask about any barriers that may prevent young people from receiving health care and anything that makes it easier for young people to access care.

- What are the challenges/barriers that prevent young people from using the health service?
  - Prompts: health care staff, opening times, cost, transport, lack of services provided, confidentially, family/friends, cultural safety
- What supports/helps young people to be able to use the health services?
  - Prompts: family/friends, cultural safety, friendly health care staff, reassures confidentially, diverse services provided, opening times, cost, transport
- What do you think could be done to improve access to health service for young people living in your community?
- What would encourage young people to use health services?

Lastly, what do you think the strengths of young people in your community are?

To conclude, is there anything that we have not covered that you would like to discuss?

#### 38. Is there anything else you'd like to tell us, about the care you provide to adolescents?

39. Is there anything else you'd like to tell us, about the enablers and barriers to providing care?

40. Is there anything else you'd like to tell us, about what you need to provide the best care you can?

End of questionnaire. Thank you.

# Appendix G: Health Providers/Professionals Interview Guide (IDI\_hw)

Title	Paving the path to accessible health care for Indigenous adolescents
Project Number	
Principal Investigator	A/Prof Peter Azzopardi
Location	Cairns, Victoria
Survey method	In depth interviews with health providers

Thank you very much for agreeing to participate in this interview.

Today we invite you to share your opinions and reflections on what the health needs of young people are, what keeps them healthy and explore barriers to attending primary health services.

During the discussion we would like to encourage you to please not refer to individuals, places, and dates by name; if actual names are used, they will be replaced with a pseudonym in the field notes.

## Introductions and acknowledgement

- Facilitator and participant to introduce themselves.
- Please tell me about yourself.

## Health issues for young people

I would like to learn a bit about your perspective of the health issues facing young people.

- In your opinion, what are the key health issues for young people?
  - Prompts: Being away/disconnected from culture, family or friends, social and emotional wellbeing, sexual and reproductive health, smoking, use of alcohol or drugs
- How does this impact a young person's life?
  - Prompts: Other areas of life or wellbeing e.g. mental, social and emotional, school, work, family, friends, engaging in healthy life choices
- From your perspective, what are the major social emotional wellbeing issues facing adolescents today?
  - Prompts: Being away/disconnected from culture, family or friends, racism and discrimination, bullying and online harassment, climate change etc
- How can a young person remain healthy?

network, friends, family, school, work, active lifestyle, nutritious food, taking medications

## Enablers and barriers

- In your opinion, what are the challenges and barriers to providing health care for young people?
  - Prompts: knowledge of services, ability of services to cater for young people, suitable hours for young people, availability of services (ie limited mental health services)
- What supports and enables good health care to young people?
  - Prompts: allocated resources, friendly and welcoming services, collaborative approaches
- What do you think could be done to improve access to health service for young people?
  - Prompts: tailored service, welcoming environment, respect, young people included in the decision-making process

## Service delivery

- How you think that health care to young people can be improved?
  - Prompts: training, finding out from young people, including young people in the service design or structure
- What would help you strengthen/enhance the health care you provide to young people?
  - $\circ$  Prompts: training, support, leadership, funding, resources
- What areas of training would support you/would you like in health care provision for young people?
  - Prompts: sexual health training, communication, rights, cultural safety
- What would an ideal youth friendly service look like?
  - Prompts: welcoming to young people, young people represented in the service structure, services that are specific to young people's needs
