Standards for Reporting Qualitative Research (SRQR)*

http://www.equator-network.org/reporting-guidelines/srqr/

Page/line no(s).

Title and abstract

Title - Concise description of the nature and topic of the study Identifying the	
study as qualitative or indicating the approach (e.g., ethnography, grounded	
theory) or data collection methods (e.g., interview, focus group) is recommended	P1.
Abstract - Summary of key elements of the study using the abstract format of the	
intended publication; typically includes background, purpose, methods, results,	
and conclusions	P2.

Introduction

Problem formulation - Description and significance of the problem/phenomenon	
studied; review of relevant theory and empirical work; problem statement	P3
Purpose or research question - Purpose of the study and specific objectives or	
questions	P4

Methods

	,
Qualitative approach and research paradigm - Qualitative approach (e.g.,	
ethnography, grounded theory, case study, phenomenology, narrative research)	
and guiding theory if appropriate; identifying the research paradigm (e.g., post	
positivist, constructivist/ interpretivist) is also recommended; rationale**	P4
Researcher characteristics and reflexivity - Researchers' characteristics that may	
influence the research, including personal attributes, qualifications/experience,	
relationship with participants, assumptions, and/or presuppositions; potential or	
actual interaction between researchers' characteristics and the research	
questions, approach, methods, results, and/or transferability	P5
Context - Setting/site and salient contextual factors; rationale**	P5
Sampling strategy - How and why research participants, documents, or events	
were selected; criteria for deciding when no further sampling was necessary (e.g.,	
sampling saturation); rationale**	P5

Ethical issues pertaining to human subjects - Documentation of approval by an	
appropriate ethics review board and participant consent, or explanation for lack	
thereof; other confidentiality and data security issues	P4/5
Data collection methods - Types of data collected; details of data collection	
procedures including (as appropriate) start and stop dates of data collection and	
analysis, iterative process, triangulation of sources/methods, and modification of	
procedures in response to evolving study findings; rationale**	P4/5
Data collection instruments and technologies - Description of instruments (e.g.,	
interview guides, questionnaires) and devices (e.g., audio recorders) used for data	
collection; if/how the instrument(s) changed over the course of the study	P5
Units of study - Number and relevant characteristics of participants, documents,	
or events included in the study; level of participation (could be reported in results)	P5/6
Data processing - Methods for processing data prior to and during analysis,	
including transcription, data entry, data management and security, verification of	
data integrity, data coding, and anonymization/de-identification of excerpts	P5
Data analysis - Process by which inferences, themes, etc., were identified and	
developed, including the researchers involved in data analysis; usually references a	
specific paradigm or approach; rationale**	P5
Techniques to enhance trustworthiness - Techniques to enhance trustworthiness	
and credibility of data analysis (e.g., member checking, audit trail, triangulation);	
rationale**	P5

Results/findings

Synthesis and interpretation - Main findings (e.g., interpretations, inferences, and	
themes); might include development of a theory or model, or integration with	
prior research or theory	P6-14
Links to empirical data - Evidence (e.g., quotes, field notes, text excerpts,	
photographs) to substantiate analytic findings	P6-14

Discussion

Integration with prior work, implications, transferability, and contribution(s) to	
the field - Short summary of main findings; explanation of how findings and	
conclusions connect to, support, elaborate on, or challenge conclusions of earlier	P14-16

scholarship; discussion of scope of application/generalizability; identification of	
unique contribution(s) to scholarship in a discipline or field	
Limitations - Trustworthiness and limitations of findings	P16

Other

Conflicts of interest - Potential sources of influence or perceived influence on	
study conduct and conclusions; how these were managed	P17
Funding - Sources of funding and other support; role of funders in data collection,	
interpretation, and reporting	P17

*The authors created the SRQR by searching the literature to identify guidelines, reporting standards, and critical appraisal criteria for qualitative research; reviewing the reference lists of retrieved sources; and contacting experts to gain feedback. The SRQR aims to improve the transparency of all aspects of qualitative research by providing clear standards for reporting qualitative research.

**The rationale should briefly discuss the justification for choosing that theory, approach, method, or technique rather than other options available, the assumptions and limitations implicit in those choices, and how those choices influence study conclusions and transferability. As appropriate, the rationale for several items might be discussed together.
