---

Crude SHR<sup>\*</sup> represents the relative subhazard ratio;

Adjusted SHR<sup>†</sup> represents the adjusted subhazard ratio: mutually adjusted for accepted acupuncture, age, sex, comorbidities, and drugs used in competing-risks regression models.

Abbreviation: Nonsteroidal anti-inflammatory drugs (NSAIDs), DMARD (disease-modifying antirheumatic drugs).

Supplementary Table 2. Incidence rates, subhazard ratios and confidence intervals of ischemic stroke in rheumatoid arthritis patients who received and did not receive acupuncture in the stratification of sex, age, comorbidities, and drug used using the competing-risks regression models.
