Supplementary material 7. Overview of score matrix of data set

CATEGORIES	LABEL LEVEL 1	LABEL LEVEL 2	VALUE
ARTICLES FOR FULL-TEXT SCREENING			
	No.		Number Endnote database
	Articles		Author(s). Year of publication (YYYY) Title of article. Abbreviated title of journal, volume number (issue number), page numbers. DOI.
	Group 1 - Value-Based Healthcare	implementation of VBHC strategies	1 = yes OR ' ' = no
		application of VBHC-components	1 = yes OR ' ' = no
	Group 2 - Military patient care pathway	acute/trauma care in military operations (operational)	1 = yes OR ' ' = no
		definitive healthcare / rehabilitation (post-operational)	1 = yes OR ' ' = no
	Medical grouping		Group 1 OR Group 2 OR Group 1 & 2
	Remarks		Text
VALUE-BASED HEALTHCARE			
	Implementation of VBHC strategies	implementing a system using multiple VBHC components	number of components (≥2: positive probability of success)
		improving value for the patient by transformation/change of the current system	exploratory text
	Application of VBHC-components	Integrated Practice Units	x = no application OR text = applied component
		Measure outcomes and costs for every patient	x = no application OR text = applied component
		Move to bundled payments for care cycles	x = no application OR text = applied component
		integrate care delivery across separate facilities	x = no application OR text = applied component
		Expand excellent services across geography	x = no application OR text = applied component
		Build an enabling information technology platform	x = no application OR text = applied component
		patient-centred care/shared decision making	x = no application OR text = applied component
	Remarks	remarks, additional information	Text
CLINICAL / MEDICAL			
	Year		years
	Country		text
	Center/ Program		text
	Main outcomes vbhc		description
	Population		N
	ISS		score
	Time to survey/ Follow up		years
